

Why choose a bespoke log cabin company?

When you're looking for a customisable log cabin for your home or garden, it is important to work with a manufacturer that understands your requirements. Here at Log Cabins Lakeland, we draw up all log home floor plans around your personal needs – whether that be a cabin design with a loft space or a custom built workshop.

Here's five reasons why it's better to work with a bespoke log cabin company

1. Your custom log cabin will be personal to you

All the little touches, from the window boxes filled with flowers, to the wraparound porch with elegant detail, will be unique to you and your home.

2. Floor plans are built around your needs

You may need a log cabin home that will accommodate a wheelchair, or perhaps you are looking for a compact space that includes clever loft storage. With requirements such as these, it is important to speak to a specialist manufacturer who builds customisable log cabins.

3. You'll be updated on progress at every turn

When you choose a bespoke log cabin company, you also choose to work with a professional. At Log Cabins Lakeland, we manage your order with all the care and precision as if it were our own log cabin. We'll speak to you every step of the way and ensure you're always informed of the progress of your bespoke log cabin build.

4. We'll handle the delivery and the installation for you

To make your life easier, we offer a free delivery service across the UK. We also manage the installation for you, from foundations through to finishing touches. This gives you the peace of mind you need to relax and enjoy your custom built cabin.

5. You'll benefit from high grade materials and foundations

We use only slow grown timber in our bespoke log cabins. Nordic timber is grown from the coldest regions in order to keep growth rings tight and reduce movement in the timber.
